

# LED Street and Area Lighting

A practical and inexpensive way to bring all of the advantages of LED lighting to your community or commercial property

Street lights and parking lot lights present many unique financial and operational challenges for developers, businesses, HOAs and municipalities. Not only do the luminaires need to complement the neighborhood, shopping center, business or community, they require 24/7 maintenance services to ensure a continuous sense of safety and security.

The images above compare LED fixtures versus High Pressure Sodium (HPS).

## Introducing the new LT-1 Tariff

FPL can help to alleviate your street and area light challenges by applying our new LT-1 tariff. We offer a variety of premium street and area lighting options using LED technology, providing whiter, brighter and more consistent light.

- » Typically no upfront capital is required
- » Material, installation, maintenance and energy costs are paid in monthly service fees
- » All lights are equipped with Smart Nodes that auto generate light outage notifications

## Benefits of LED Lighting

- Superior light distribution
- Less light wasted equals less light needed
- Better color rendition
- Colors, lines and objects are easier to distinguish; improves visibility and safety
- Reduced energy consumption
- Reduced carbon footprint and lower energy bills
- More dependable fixtures
- Fewer outages and lower maintenance costs
- Greater variety
- More choices to address diverse needs

## FPL – Leaders in Light

- » Providing street light services for over 60 years
- » Own and maintain over 500,000 lights throughout our territory
- » Broad selection of lighting solutions specifically chosen to withstand coastal environment

For more information regarding how FPL can help with your new or existing commercial project, please contact Michael Meier at 561-640-2518 or email [Michael.Meier@fpl.com](mailto:Michael.Meier@fpl.com).
